Wow shipyard guide

Equipment Plan: Bilge Pump, Equipment Plan: Gyroscopic Internal Stabilizer, Equipment Plan: Trained Shark Tank, Equipment Plan: Ice Cutter, Equipment Plan: Fog Lights, Equipment Plan: Felmoke of rare in Tanaan Jungle for example. In order to obtain the desired crews more quickly, you can buy Rush Order: Kronk Rustspark shipyard (Horde) or Saily Jorren (Alliance), articles that will allow you to complete the construction of a boat instantly. As a general idea, there are naval missions that offer gold as a reward. As you built your fleet, in case you get a ship with Goblin Crew, that's a guard! Do not dismantle that ship. Get the correct configuration of the fleet. 4. These crews are very valuable, so it is better not to risk losing two ships with this type of crew. But more than 80% probability, it is quite good. Obviously, build your shipyard, and level your fleet. 1. As you are working on your ships plans, you should also get the equipment plans for your ships. I have rarely lost ships in more than 80% missions. Obviously, if you have a shipyard with all the ships in 2-3 characters, that weekly gold sum will multiply. But it depends on you if you want to stay with one. With a configuration like this, you should be able to cover at least two missions at a time. There are others, but you will discover them while you work on your shipyard. Once you have unlocked all the ships, one of the best fleet configurations to go with, is 1 submarine, 1 transport, 3 destroyers, 3 battleships, 2 aircraft carriers. Of course, you can take a month, or even more to get a fully functional shipyard in multiple characters. Once you have at least 2-3 ships with Goblin / Dwarven Crew (5 is ideal), everything you need to do is complete every day, focusing on those with golden rewards. Like other buildings in its garrison, the shipyard can become a nice and constant source of gold. But it's everything, that. Gain. 3. A ship with the crew of Murloc is important, since that boat will also work as a transport boat. To do that, here is what you need to do. Do not send two boats with a Goblin / Dwarven crew in the mission with less than 75% of success. Now, the most important aspect for the party that makes gold, is based on the crews of the boats. These rare falls 100 oil per day, by character. Now, it can take a few weeks to finish all the required missions, in order to obtain all the boats. Naval missions also require oil. I'm not going to offer a full guide to acquire them all, here. The crew of Gnomish or Troll Crew is also fine, as they can save you some lining resources by granting the sending equipment of the completed missions with success. Or, have 2 submarines of destroyers and 2, but be sure to store 3 battleships and only 1 transport. In addition, there are other ways to cultivate this currency. To be more specific, the BLOOD BLUEPRINT: The battleship requires reputation with the features mentioned, and for the Blueprint of the ship: carrier, must complete the naval domination, which requires that it completes 25 missions of the naval treasure, collection 2500 Gold lining and 2500 resources. . Therefore, a wooden mill and a commercial publication is an excellent construction combo to obtain more resources. To reduce a boat you need to be on your naval table, open the ships tab, click with the right button on the boat you want to record and select the command for it. But in case you can not, or do not want to change the configuration of your building, you can complete some weekly heroic dungeons, in order to get some resources. Once you have 10 boats, keep the dismantling of those with the crew of ORC, the Draenic crew, team Worgen, Tauren Crew and Pandaren Crew, until he gets a crew of Goblin/Dwarf. This method of making gold is quite simple once your shipyard is up and running, and your fleet is complete. In this way, you can get up to 5-6000 g or even more per week, just from your shipyard. Keep at least 2-3e with with Human equipment or crew, as ³ increase the chances of mission success, and at least 1 with the crew ³ Murloc. Tips: its shipyard increase its consumption of resources of guarniciÃ n³ as it must spend them on ship equipment, to increase the chances of success of its missions. 2. A career order costs 500 resources of garniciÃ n, and if you have 3-4000 of this coin in the character, you are working in your yard, it is not a bad idea to buy some. A ship with this type of crew ³ increases the amount of gold obtained from a mission³ by 100%. Getting the right crews can also take a while, as only one ship can be seized at that time. This guide focuses on the gold that is part of the shipyard. This will take some time, since to unlock the shipyard and the larger ships, you will need to complete a series of naval missions, gain some reputation ³ the hand of the Prophet (Alliance) and the Headhunters of Jin (Horde), and also gather some resources and gold. These are actually quite frequent, and the amount of gold obtained from a naval ³ can be multiplied. To get petrÃ leo³ you can concentrate on completing the missions of followers with oil as a reward, complete Tanaan Jungle Dailies, and defeat the 4 Rare of Ã© lite, who also release medallions of the LegiÃ n. But it's a ³ investment ³ your time and resources in the game. But sadly, not many players bother with that, and he's at a loss for that. Need at least 2-3 ships with the crew ³ Goblin (Horde), or the crew ³ Dwarven (Alliance). Get the crews of gold cattle. crews.
